## Replacing Wiper Absorber

This printer uses ultraviolet curable ink (UV ink).

When replacing the wiper absorber, **be sure to wear the supplied goggles and gloves.**

When "IREPLACE WIPER/ABSORBER" appears on the screen, check the wiper absorber.

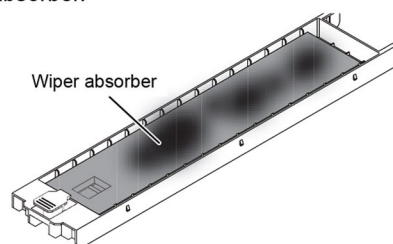

If there is ink on the absorber as illustrated by the image to the right, replace the absorber.

The following items are packed in this kit.

Check them for correct quantities and appearance.

If you find any problems, please contact your distributor or a MIMAKI office.

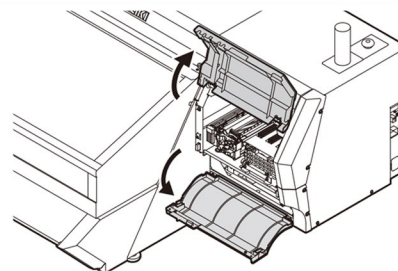

Wiper absorber.....	4 units
Wiper absorber case.....	4 units
Instruction manual for the wiper absorber kit (this document) .....	1 copy

**1** In the local mode, press **FUNC1** (MENU) first, press **▲** **▼** next, and then select **[MAINTENANCE]** - **[STATION]** - **[Replace WIPER]**.

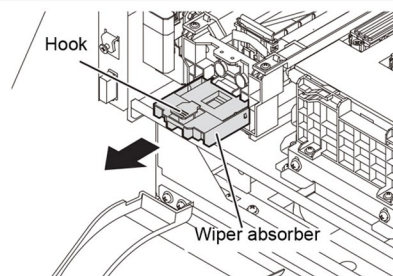

"Replace WIPER" will be selected and the carriage will move to the left edge.

**2** Open the right maintenance cover.

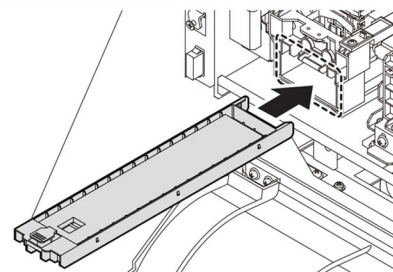

**3** Remove the wiper absorber.

To remove the absorber, push the hook down and pull out the absorber.

**4** Install the new wiper absorber.

**5** Close the maintenance cover, and press the **ENTER** key.

The warning will be reset.

**6** Press the **END/POWER** key several times.

The machine returns to LOCAL.
